

SAFER TOGETHER – TOOLBOX TALK - COVID-19 – TESTING (27 04 2021)

- Around 1 in 3 people with coronavirus do not have symptoms (asymptomatic) which means they could be spreading the virus at work without knowing
- Tests are for asymptomatic people to identify positive cases in the community and break the chain of transmission
- We urge all Colleagues to self-test at home, **even after having their vaccination**, as there is a chance they may still get or spread coronavirus
- Lateral Flow Test packs are still available for Colleagues if they need additional tests or would like to start self-testing at home – please contact a member of the HR Department
- Once supplies have been used Nifco will no longer order test kits, for a number of reasons including being unable to fully support colleagues on furlough or who are working from home
- Going forward we recommend that Colleagues order COVID-19 Self-Test kits (7 days' supply) which are available from the Government online and delivered to their home - visit: <https://www.gov.uk/order-coronavirus-rapid-lateral-flow-tests>
- Test kits are also available from pharmacies - no appointment or order necessary
- **Any colleague working on site or furloughed or working from home who needs any support eg does not have access to the internet and would like us to order a test or needs assistance in how to do a test, please contact a member of the HR Department:**
